Experience

SMU S.A

Enterprise Architecture Manager

Santiago, Chile

June 2025 – Present

- Implemented enterprise architecture capability with domain and technical architects.
- Led the implementation of SAP LeanIX, metamodel design and configuration of the enterprise architecture layers of the business.
- Led the target architecture design and technical implementation of new ecommerce landscape.

Inchcape Digital

Technical architecture leader

Santiago, Chile (Remote)

April 2024 – May 2025

- Led global DXP (Digital Experience Platform) solutions architecture team for the Ecommerce and CRM landscape. The team was distributed across Latin America and Asia regions.
- Designed new composable architecture for fragmented 120+ ecommerce sites, to allow reusability across markets and simplify management.
- Designed and implemented back-office system for sales representatives to manage stock reservations and sales management.

Solutions architect

January 2023 – March 2024

- Standardized design and governance of global integrations landscape on Google Apigee.
- Digital projects architecture design, governance and standardization of global DXP digital landscape.

Derco (Acquired by Inchcape)

Solutions architect

Santiago, Chile

August 2022 – December 2022

- Digital projects architecture design, governance and standardization of B2C digital landscape.

Technical leader

October 2021 – July 2022

- Led development team for used vehicles digital landscape "Autopia". Implementing strategic features such schedule of used vehicle's revisions and customer facing valuation of used vehicles for trade-ins.

Power Train Technologies

Software engineer

Santiago, Chile

September 2019 – October 2021

- Led the implementation of ERP Ellipse EAM to manage auxiliary fleet maintenance on Radomiro Tomic mining operation. Configured fleet machinery, maintenance strategy and developed technical system integrations.
- Engineered back-office system to manage international supply chain operations of parts required to repair power train components of mining equipment.

R&D engineer

June 2018 – August 2019

- Technical research and economic evaluation of retrofit systems of mining hauling trucks, for dual gas operation with diesel and propane. Work that led to a 1 Million USD research and prototype for engine retrofit systems.
- Prototyped IoT telemetry systems to monitor mining equipment operations.

Education

Pontificia Universidad Católica de Chile

Diploma on IoT and ML applications for the mining industry

Santiago, Chile

December 2024

Google Cloud Platform

Google Cloud Professional Cloud Architect

Santiago, Chile

September 2024

Pontificia Universidad Católica de Chile

Master Degree on Industrial Engineering, Major Mechanical engineering

Santiago, Chile

2012 - 2017

Skills & Interests

Technical: Google cloud platform, enterprise architecture, data engineering, fullstack development

Language: Spanish (Native), English (Bilingual), Chinese (HSK 1)
