Experience

SMU S.A

Enterprise Architecture Manager

Santiago, Chile

June 2025 – Present

- Established the Enterprise Architecture practice with 8 domain & technical architects, instituting Architecture Review Boards and governing the digital transformation roadmap across retail, backoffice & supply chain.
- Led enterprise rollout of SAP LeanIX across 180+ systems, architecting business capability metamodels to identify redundancies and drive application rationalization.
- Architected the target state and legacy modernization roadmap for SMU's next-generation omnichannel e-commerce platform.

Inchcape Digital

Technical architecture leader

Santiago, Chile (Remote)

April 2024 – May 2025

- Led a cross-regional architecture team across LatAm and APAC, directing the global DXP, e-commerce and CRM integrations landscape.
- Designed a composable architecture consolidating 120+ fragmented e-commerce sites into a reusable, multi-tenant global platform.
- Engineered an enterprise stock reservation and order management back-office platform for sales representatives.

Solutions architect

January 2023 – March 2024

- Defined global API governance on Google Apigee, standardizing enterprise APIs and decoupling legacy cores from digital channels.
- Governed solution architecture standards for global digital initiatives, ensuring scalability, security, and cloud-native alignment.

Derco (Acquired by Inchcape)

Solutions architect

Santiago, Chile

August 2022 – December 2022

- Governed solution architecture standards for global digital initiatives, ensuring scalability, security, and cloud-native alignment.

Technical leader

October 2021 – July 2022

- Led an agile squad (4 developers, QA, UX) building 'Autopia', delivering automated vehicle valuation algorithms and online trade-in inspection booking.

Power Train Technologies

Software engineer

Santiago, Chile

September 2019 – October 2021

- Led systems integration of ABB Ellipse EAM at Radomiro Tomic mine, optimizing maintenance schedules for 40+ heavy mining assets.
- Developed an international spare parts supply chain system, cutting powertrain repair lead time by 17%.

R&D engineer

June 2018 – August 2019

- Evaluated diesel-propane dual-fuel retrofits for haul trucks, authoring business cases that secured \$1MM USD in R&D capital funding.
- Prototyped IoT telemetry solutions for real-time monitoring of heavy mining machinery.

Education

Pontificia Universidad Católica de Chile Diploma on IoT and ML applications for the mining industry	Santiago, Chile December 2024
Google Cloud Platform Google Cloud Professional Cloud Architect	Santiago, Chile September 2024
Pontificia Universidad Católica de Chile Master Degree on Industrial Engineering, Major Mechanical engineering	Santiago, Chile 2012 - 2017

Skills & Interests

Architecture & Strategy: Enterprise Architecture (SAP LeanIX), API Strategy & Governance (Google Apigee), Cloud Transformation, IT Modernization, Microservices, Event-Driven Architecture.

Cloud & Software Development: Google Cloud Platform (Professional Cloud Architect), Kubernetes, Docker, Node.js, Python, PostgreSQL, REST/GraphQL APIs, IoT Telemetry.

Language: Spanish (Native), English (Bilingual), Chinese (HSK 1)
